SUBJECT: Multi-Site Task Force Report

On November 10, 2009, the SRJC Board of Trustees received the preliminary report of findings of the 2008/09 Multi-Site Task Force. The report is a culmination of the work of the task force over the course of the 2008/09 academic year.

Dr. Agrella has asked that we now share the report with the College community, along with the results of the survey administered last spring, and invite your comments. Dr. Agrella has requested that we continue as a group for a bit longer to study and develop the specifics of the major issue areas. He has further suggested that we may want to augment our membership with non-task force individuals who have a particular interest or special knowledge that would help us in our work. If you have specific comments or suggestions that you feel would be useful, please forward them to the task force co-chairs so we may compile them for task force consideration.

The report and survey results have been posted on the SRJC Planning webpage and the links to both are provided below.

Our thanks and appreciation to all who took part in the survey last spring and to those of you who share our continued commitment to this important effort.
