

# Acknowledgments

---

A critical component to writing a software manual is identifying the SME's, or 'Subject Matter Experts'. These are the people that will be pivotal in shaping the documentation to reflect the users' needs. A special thank you goes out to the following individuals for being very supportive during the constant editing and re-writes:

**Nancy Luke, Senior Programmer Analyst  
Santa Rosa Junior College**

Nancy was there from the project inception in 1994 through the initial users' training in 1996. She led a collaborative project with programmers from Cabrillo and Cuesta to create the software and continues to maintain it today. Nancy was a key resource in the development of the documentation.

**Karen Tabacco, Administrative Assistant II  
Santa Rosa Junior College**

Karen works in the Computer and Information Sciences Department at SRJC. Courses in this department are continually being adapted to reflect changes in technology, which translates into heavy use of the curriculum program. Karen used previous versions of the software before J03, so she has a special appreciation for the additional features that have been added. Her input was invaluable.

**Debra Montgomery, Articulation Specialist  
Santa Rosa Junior College**

Debra is another SME in the articulation field. A skilled user with an eye for accuracy, Debra explained the role of articulation in the curriculum process. This complex curriculum component was made clear with her assistance.

**Cheri Winter, Scheduling Tech Senior  
Santa Rosa Junior College**

Cheri is an SME both in curriculum and scheduling. She recently offered her time (along with Karen Tabacco) at the 2001 Users' Forum in Monterey. Cheri answered questions from the consortium schools and demonstrated how the program could best be utilized.
