

MLA CITATION EXAMPLES: Electronic Databases

This guide is published as a supplement to the MLA Style Sheet, which can be found at <http://www.santarosa.edu/library/guides/mla.pdf>

Libraries pay a license fee for access to information in Electronic Databases provided by subscription services such as *ProQuest* or *Thomson Gale*. These databases provide information from different source types such as essays, reference sources or magazine/newspaper articles. Since most of these sources originated as print versions, MLA requires the inclusion of citation elements from both the print and the electronic versions.
