

Adobe InDesign 1 *online*

Cyndi Reese • Spring 2009

Text Styles

Part 1: Get Started

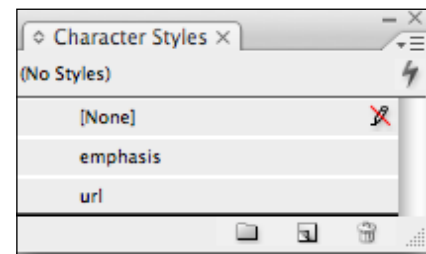

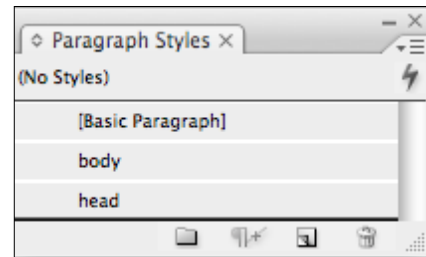

Go to the class website and download the Lab9.indd InDesign document for use in your advertisement. CS3 users will use Lab9.inx. Right-mouse (PC) or control click (Mac) to save the file to your hard drive. Safari users may need to remove the .txt extension and replace with .indd so that the file will open properly.

Before you begin, look at some samples of formatted documents that used paragraph and character styles. At the class website, download Lab9sample.pdf. This contains the first page of submitted work (Best of Class) from last semester's class in Spring 2008. How can you incorporate the paragraph and text formatting options discussed in class as well as layout features? There are also some useful links at the class website on choosing the right font and design.

Part 2: Apply text styles to the document

Complete Exercise 9 Text Styles from *Stepping Out With InDesign*. In addition to the requirements of this exercise, include the following:

- The document includes various references to CS3 instead of CS4 and Acrobat version 8 instead of 9. Use the **Edit..Find/Change** menu to fix these problems. Do not use the Change All option (i.e. changing “3” to “4”), but instead use the options to individually change and find occurrences (so that my phone number 527-4293 does not get changed).
- Use the **Type..Change Case** menu to apply the Title Case option to the headers above body text paragraphs (i.e. *Section info* or *InDesign classes at SRJC*.) Sadly, this is not an option that can be included in a paragraph style, so this character formatting adjustment must be made manually to each selected header.
- To best enhance the URL character style, add the Basic Character Formats option of No Break, so that web and email addresses do not wrap on separate lines of text.

At the end of this exercise, you will have two versions of the introductory handout. *Decide which of the two documents you like the best and submit your favorite as a PDF at CATE.*

Checklist:

- Turn in either Lab9a or Lab9b as a 2-page PDF at CATE
- Take Quiz 4 at CATE on text formatting and styles
